

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph bridging pages 7-8 with the following amended paragraph:

Still further, the inventor established an animal model highly reflecting the pathological feature of human glioblastoma and used this model for verifying the effect in accordance with the invention. The animal model with a transplanted human glioblastoma cell line CGNH-89 as established by the inventor reflects the pathological feature of human glioblastoma, where the cell vigorously invades the inside of brain parenchyma and the subpial brain to induce ~~disseminated meningitis~~ meningeal dissemination.
